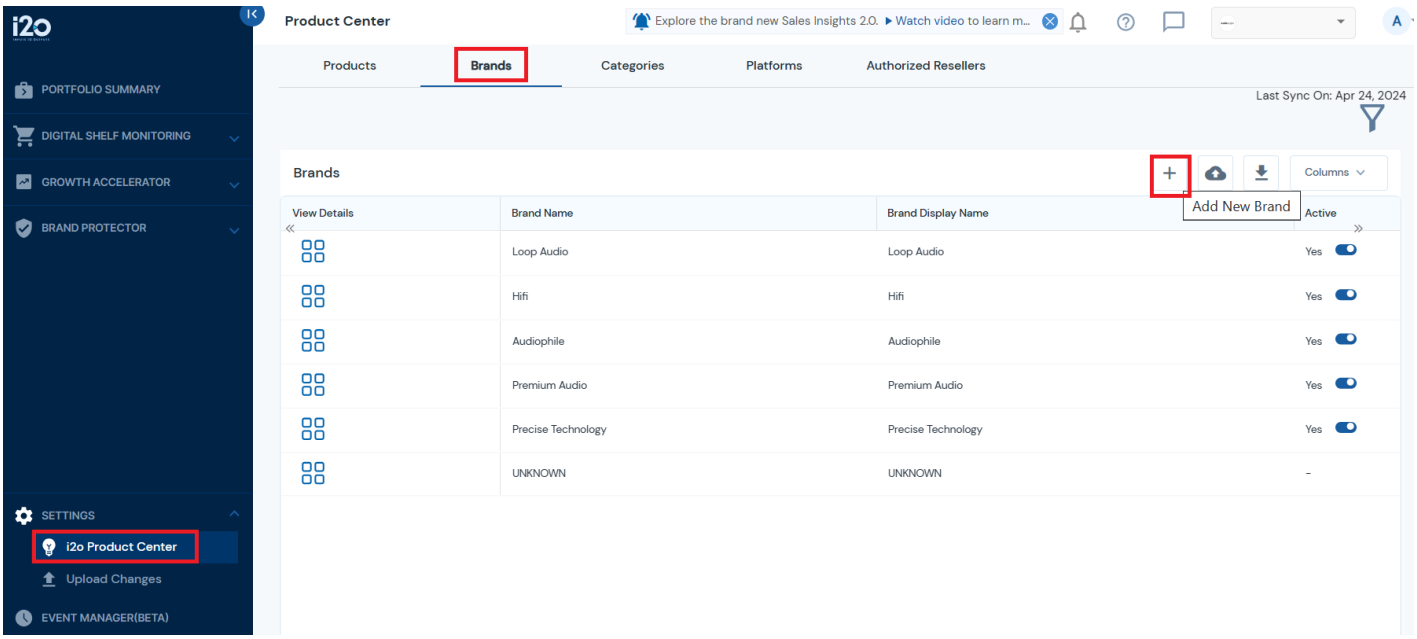
How To Add A New Brand

On the home page of the i2o's Product Center, we have a dedicated **Brands** tab.
It allows you to handle all your brand-related tasks in one place: adding new brands, customizing, and viewing the brands you have already added. It's a straightforward way to manage your brands efficiently, whether you're keeping an eye on them or enforcing regulations.

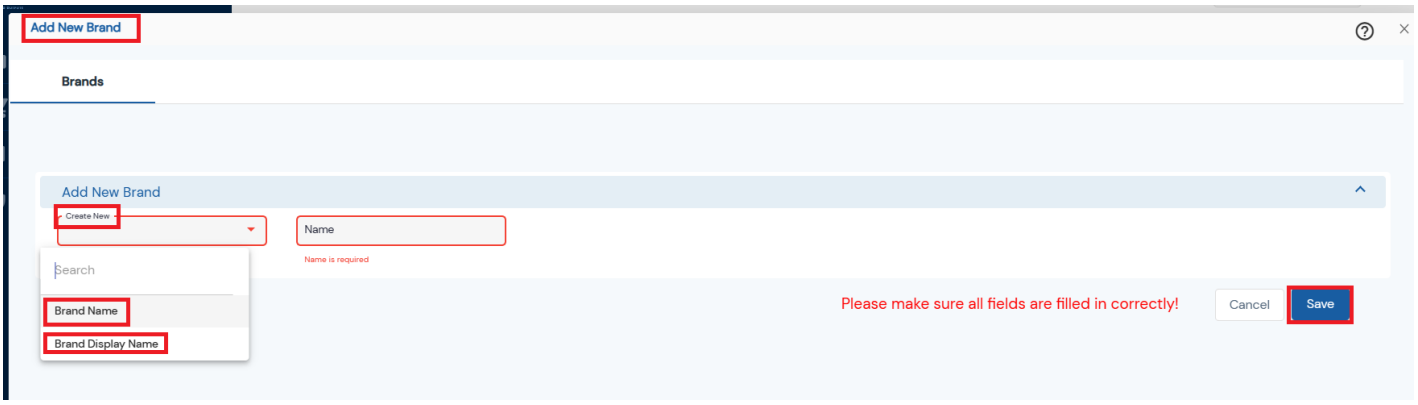
How to Add a New Brand

Follow the below steps to add a New Brand for i2o monitoring and/or enforcement.

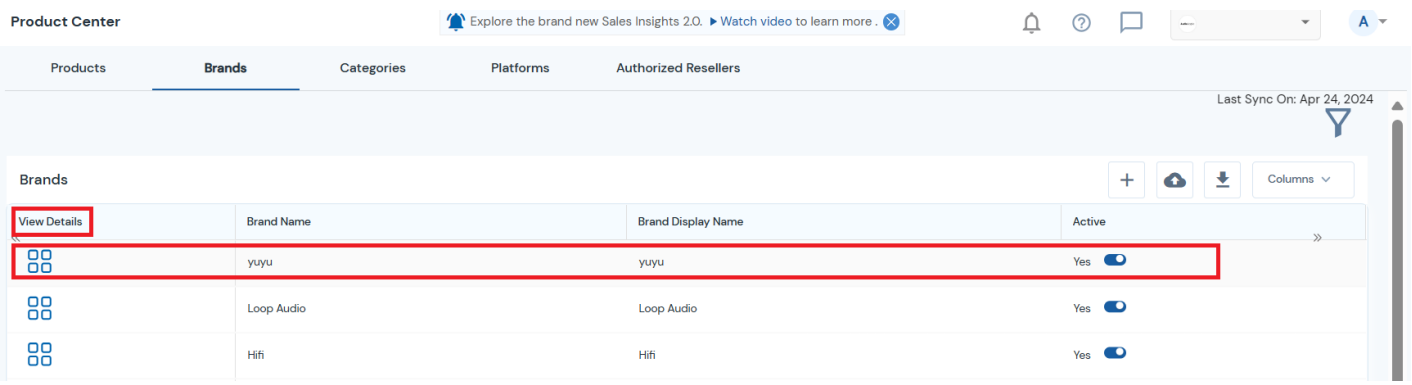
1. Navigate to **i2o** Platform > **Settings** > **i2o Product Center** > **Brands**.
2. Click on the **Add New Brand**.



3. The Add New Brand pop-up opens,
   Choose the **Create New** option from the drop-down menu.



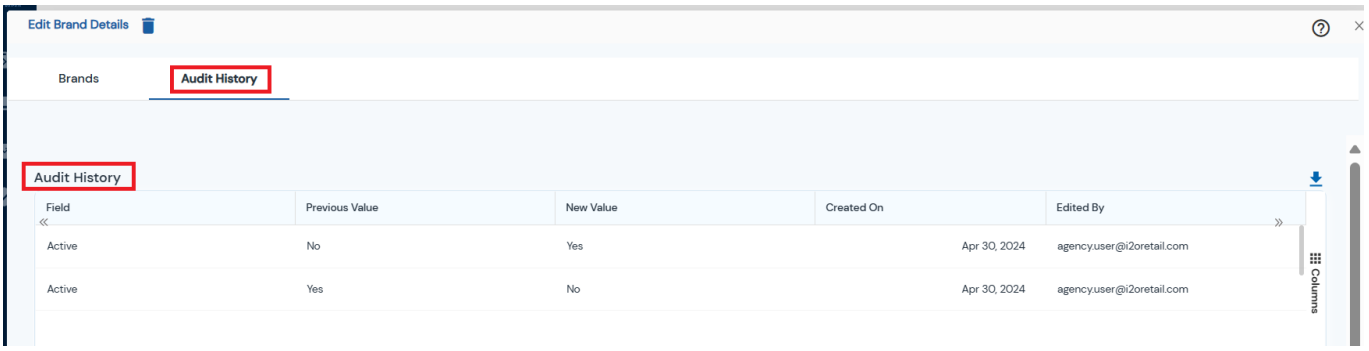
4. Select **Brand Name** and enter the name of brand. Then, select **Brand Display Name** and enter the brand's display name.
5. Click **Save**.
6. This adds the Brand to the Product Center. The added brand appears in the View Details table on the Brands tab.



How to view the Brand Audit History

The i2o Product Center stores a history of past changes made to your i2o-activated brands.
To view the Audit History of a Brand, follow the below steps:

1. Navigate to i2o Platform > Settings > i2o Product Center
2. Click on the Brands tab.
3. Browse the View Details table. Click on the grid icon ⊞ on the Brand row or use filter to search the required Brand.



4. Click on the Audit History tab to view the changes made to the Brand.
5. Click on the down arrow to download the change history.
6. Click on the cross to close the window.
