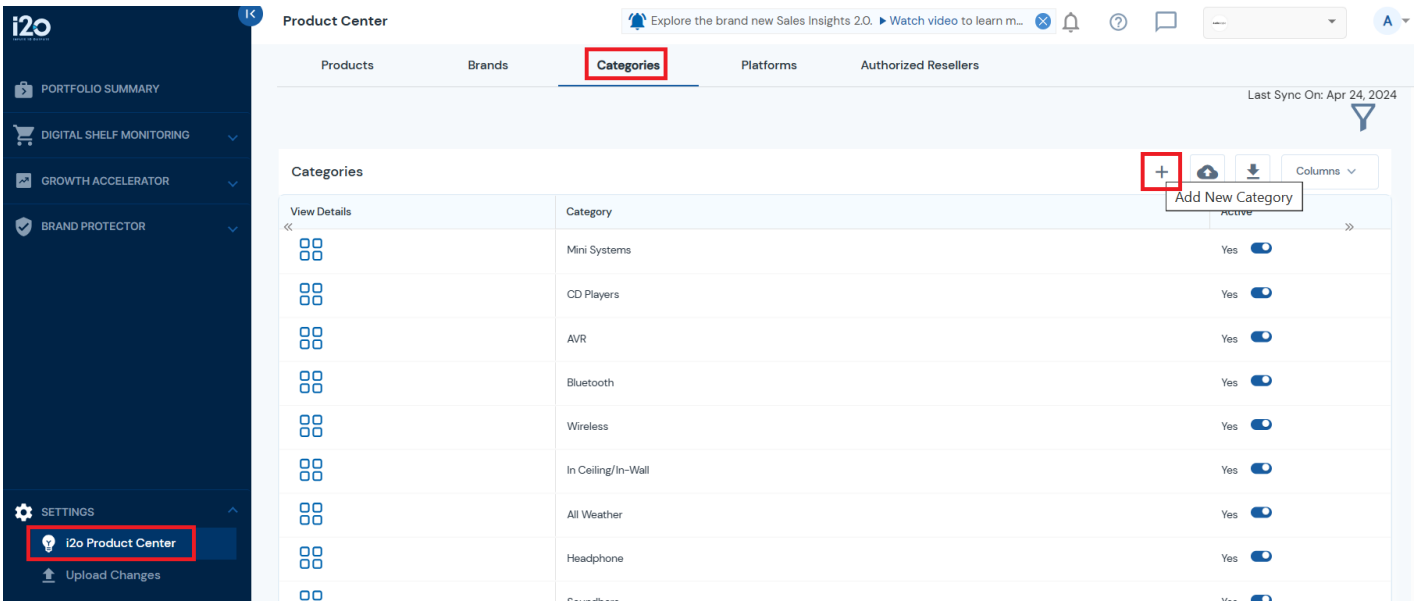
How To Add A New Category

On the home page of i2o's Product Center, there's a dedicated **Categories** tab, specifically designed for managing product categories.
Categories tab allows you to add new categories, customize them, and view the ones you've already added. It is a simple solution for managing your product categories, whether you're monitoring trends or enforcing specific regulations.

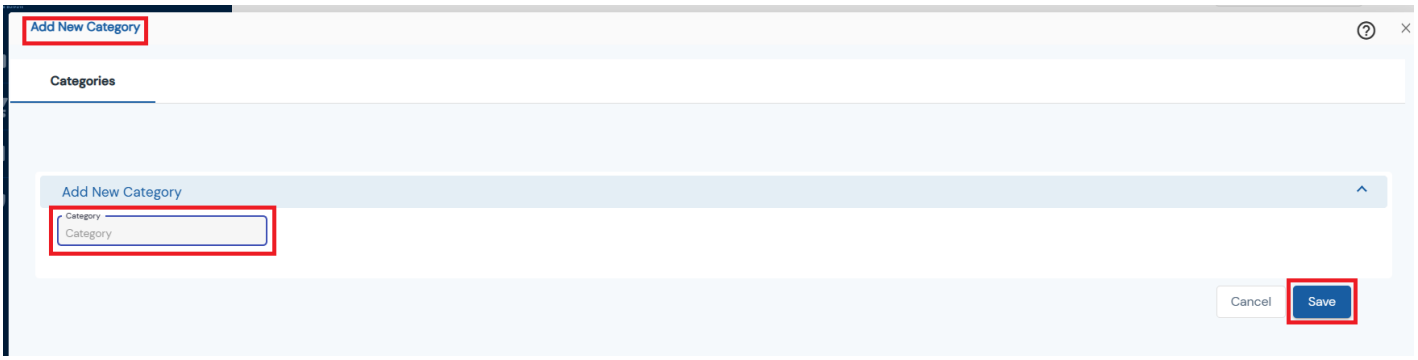
How to Add a New Category

Follow the below steps to add a New Category for i2o monitoring and/or enforcement.

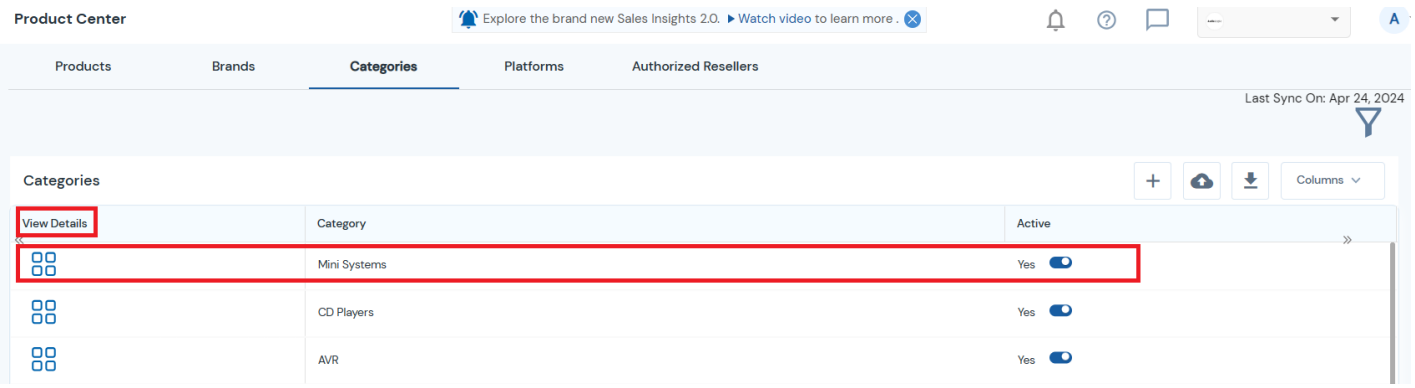
1. Navigate to **i2o** Platform > **Settings** > **i2o Product Center** > **Categories**.
2. Click on the **Add New Category**.



3. The Add New Category pop-up opens.
4. Type the Category name in the Category field.



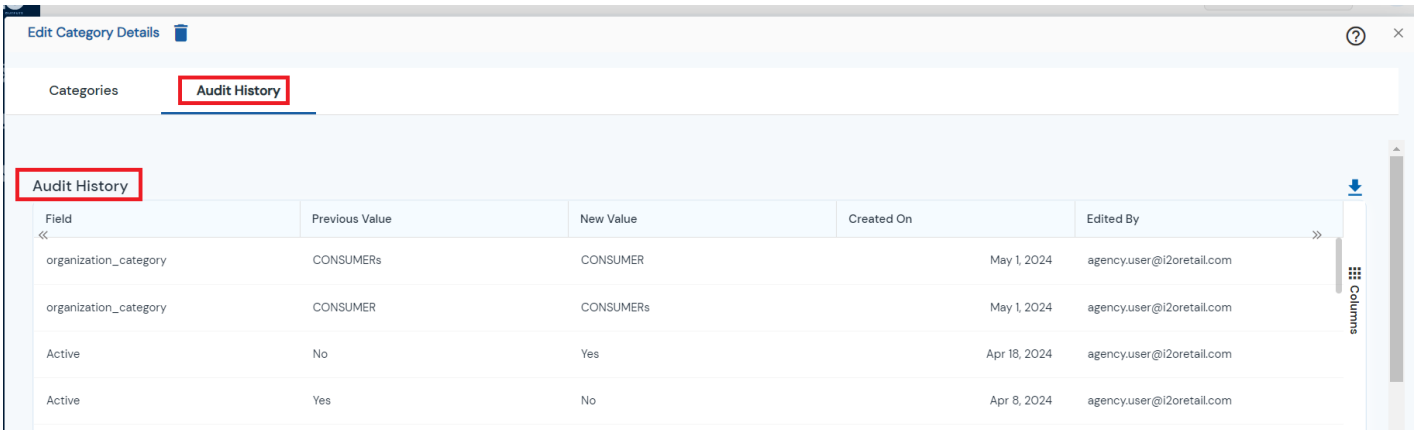
5. Click **Save**.
6. This adds the Category to the Product Center. The added Category appears in the View Details table on the Categories tab.



How to View the Category Audit History

The i2o Product Center stores a history of past changes made to your i2o-activated brands. To view the audit history of a Category:

1. Navigate to i2o Platform > Settings > i2o Product Center > Categories.
2. On the Categories page, in the View Details column, click on grid icon on the Category row or use the filter to search the Category.
3. Click on Audit History to view the changes made to the Category.



4. Click on the down arrow to download the change history.

5. Click on the cross to close the window.
