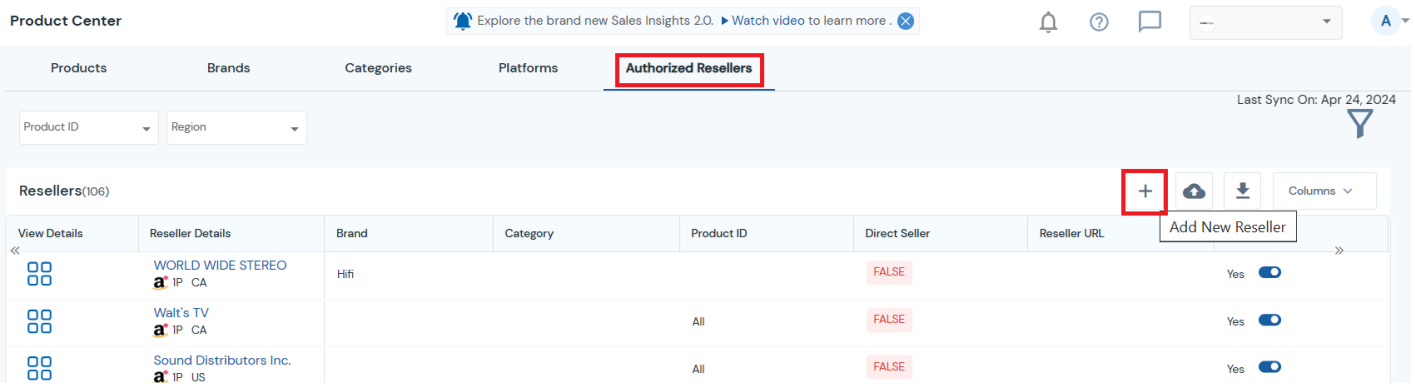
How To Add A New Authorized Reseller

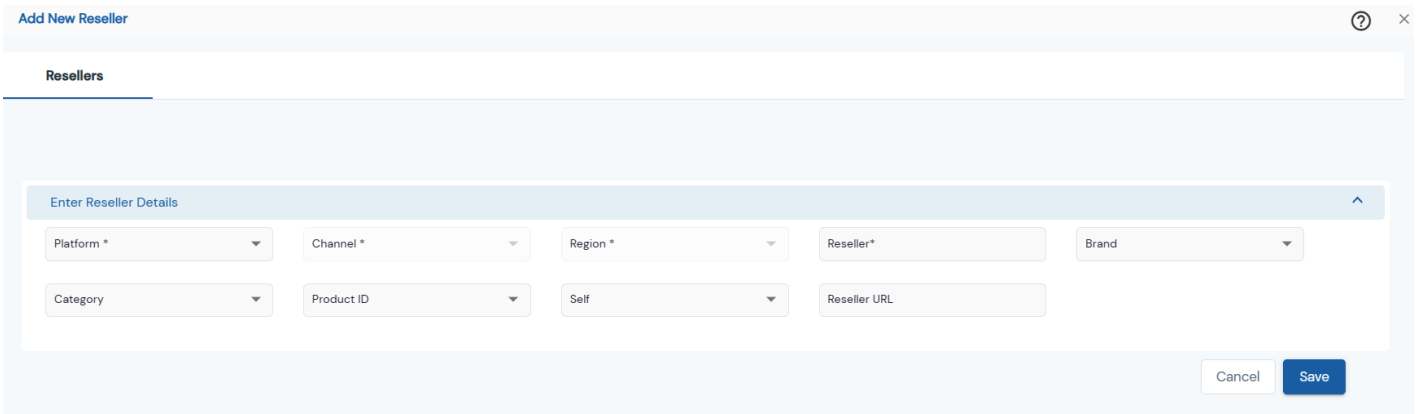
On the i2o Product Center's home page, there's an **Authorized Resellers** tab.
This tab simplifies tasks related to your resellers, allows you to add new ones, customize their profiles, and review the existing ones.

How to Add a New Authorized reseller

1. Go to the **Authorized reseller** tab.
2. Click on **Add new Reseller**.



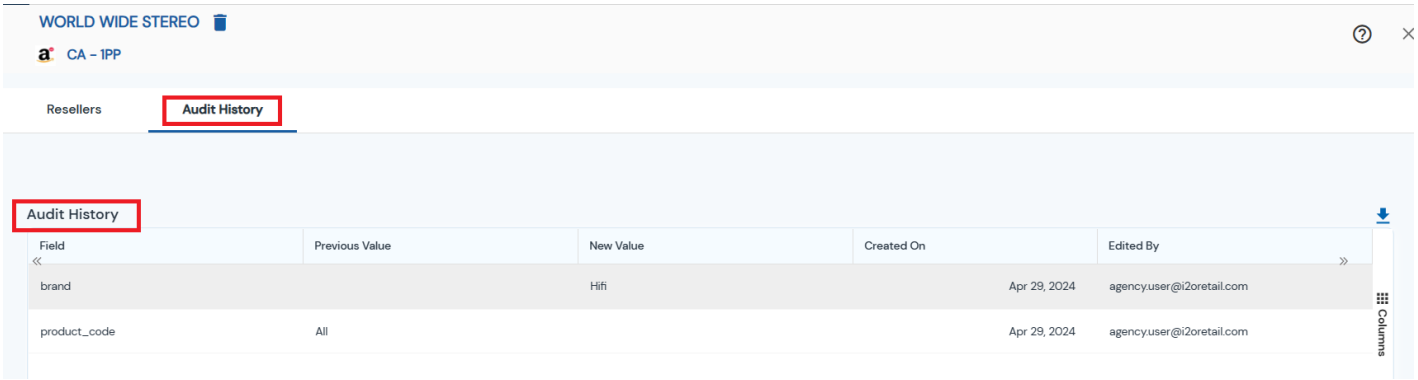
3. Fill in the mandatory details and click Save. Resellers can be added at the brand, category, or product ID level and can be easily downloaded/uploaded using the download/upload button.



How to View the Audit History

The i2o Product Center stores history of past changes made to your i2o activated products. To view the audit history for a product:

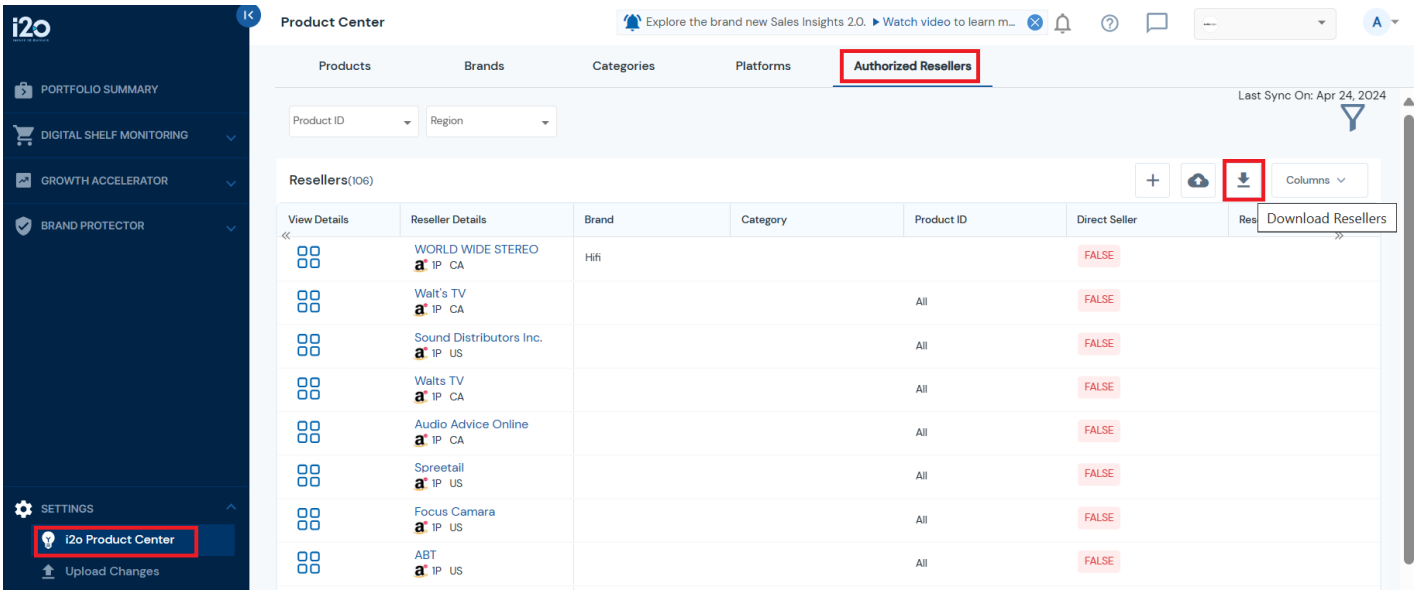
1. Navigate to i2o Platform > Settings > i2o Product Center > Authorized Resellers.
2. Browse the View Details table. Click on next to the concerned brand.
3. In the pop-up, click on the Audit History tab. The Audit History table provides you all the details.



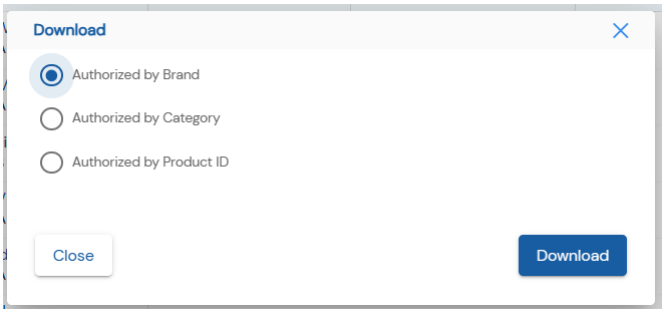
4. Click on the down arrow to download the change history.
5. Click on the cross to close the window.

How to Download Resellers

1. In the i2o Product Center, go to the **Authorized Resellers** tab.
2. In the View Details table, click on **Download Resellers**.



3. Choose from the three download options. Click **Download**.



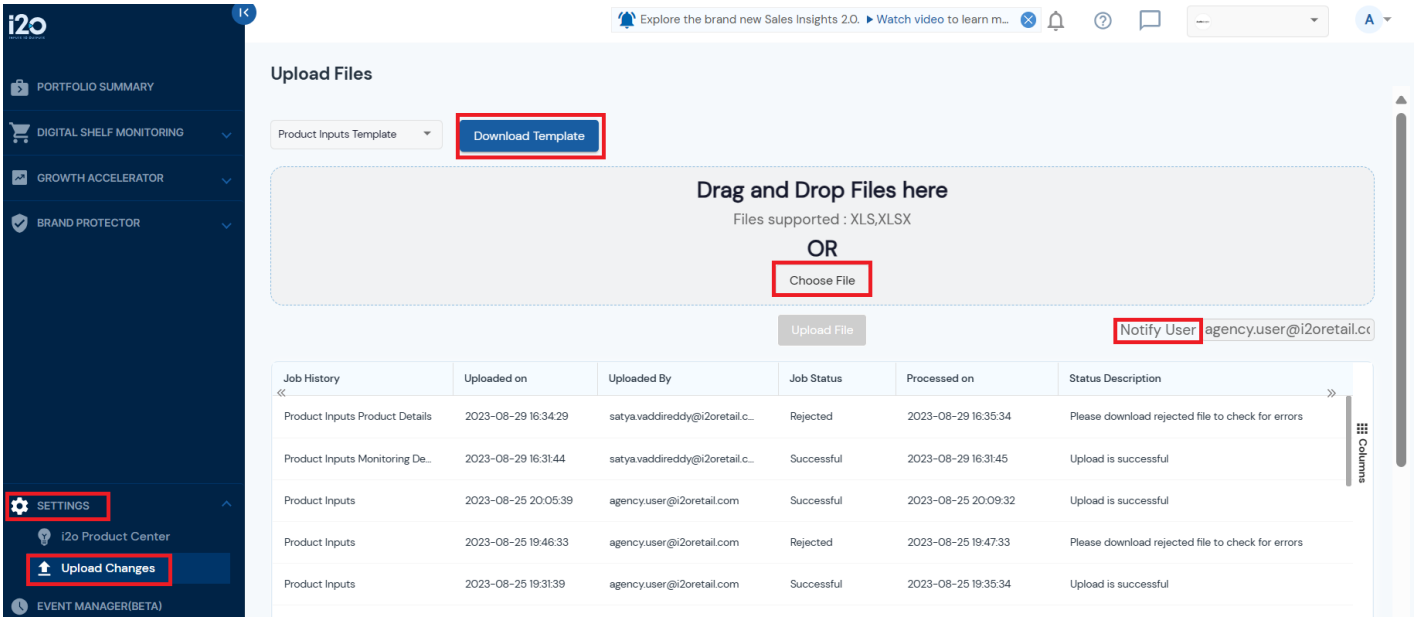
4. The downloaded file opens automatically in a new tab of your default browser or gets saved in the local Downloads folder of your computer. You can open this file (XLS/XLSX), review, make edits and reupload.

How to Add New Authorized Resellers in bulk

1. Navigate to i2o Platform > Settings > Upload Changes.
2. Click on Download Template to download the template as an XLS/XLSX file. Update the file and save as XLS or XLSX.

> ⓘ User can assign a reseller either at Brand or Category or Product id, not all three at once.

3. To add your changes, you may either Drag and Drop Files here or use the **Choose File** button to browse your file for upload.



4. Click Upload File.
5. You can notify other users by entering the email addresses separated by comma in the Notify User field. This is optional.
6. The bulk changes made will be reflected in the View Details table of Authorized Resellers screen on i2o Platform > Settings > i2o Product Center.
