Portfolio Summary

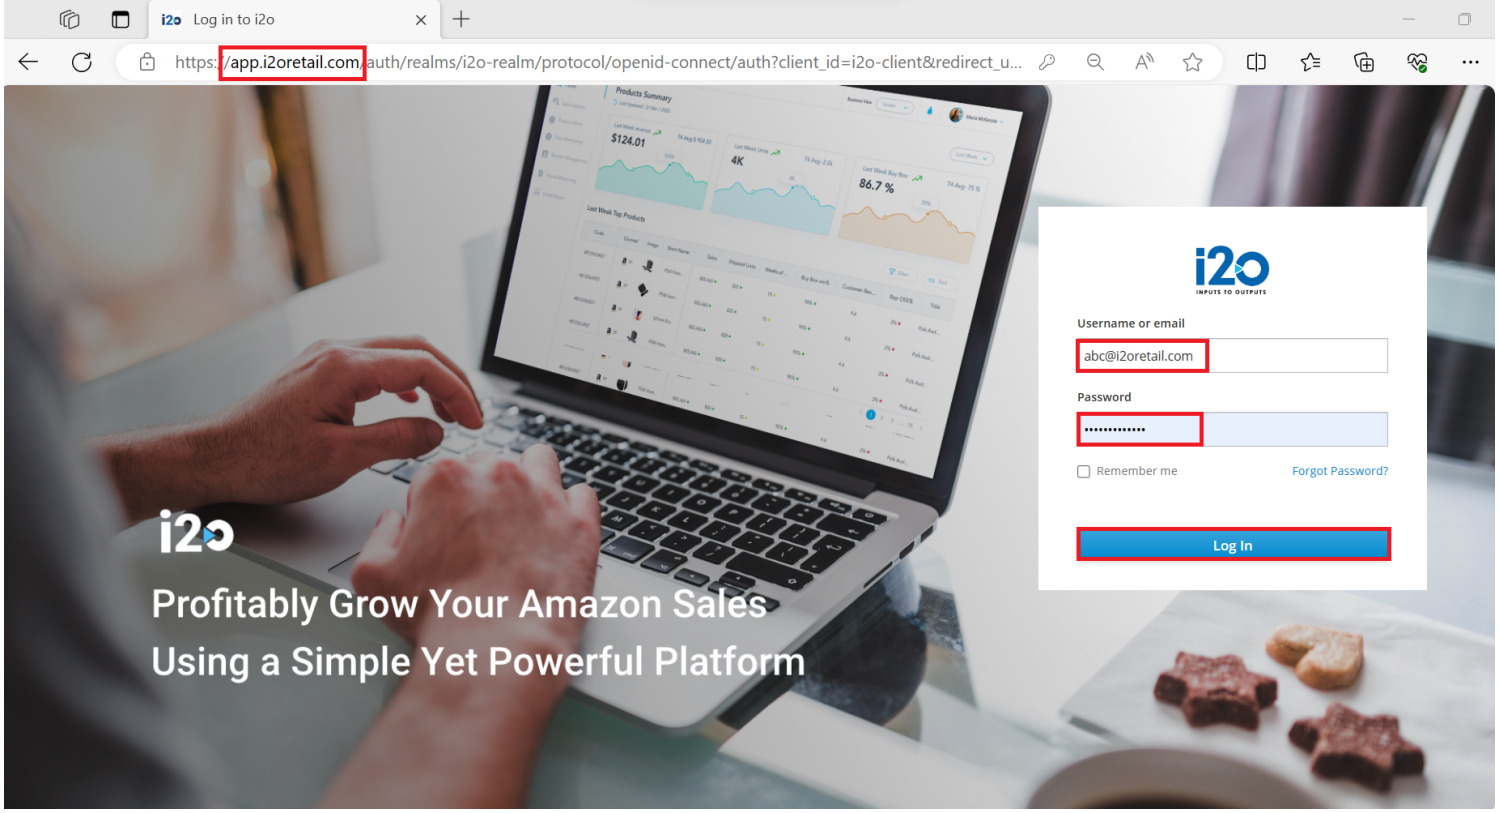
Introduction

Upon logging into your i2o account, the Portfolio Summary provides an immediate overview of your account's portfolio performance. This assessment is based on key metrics.

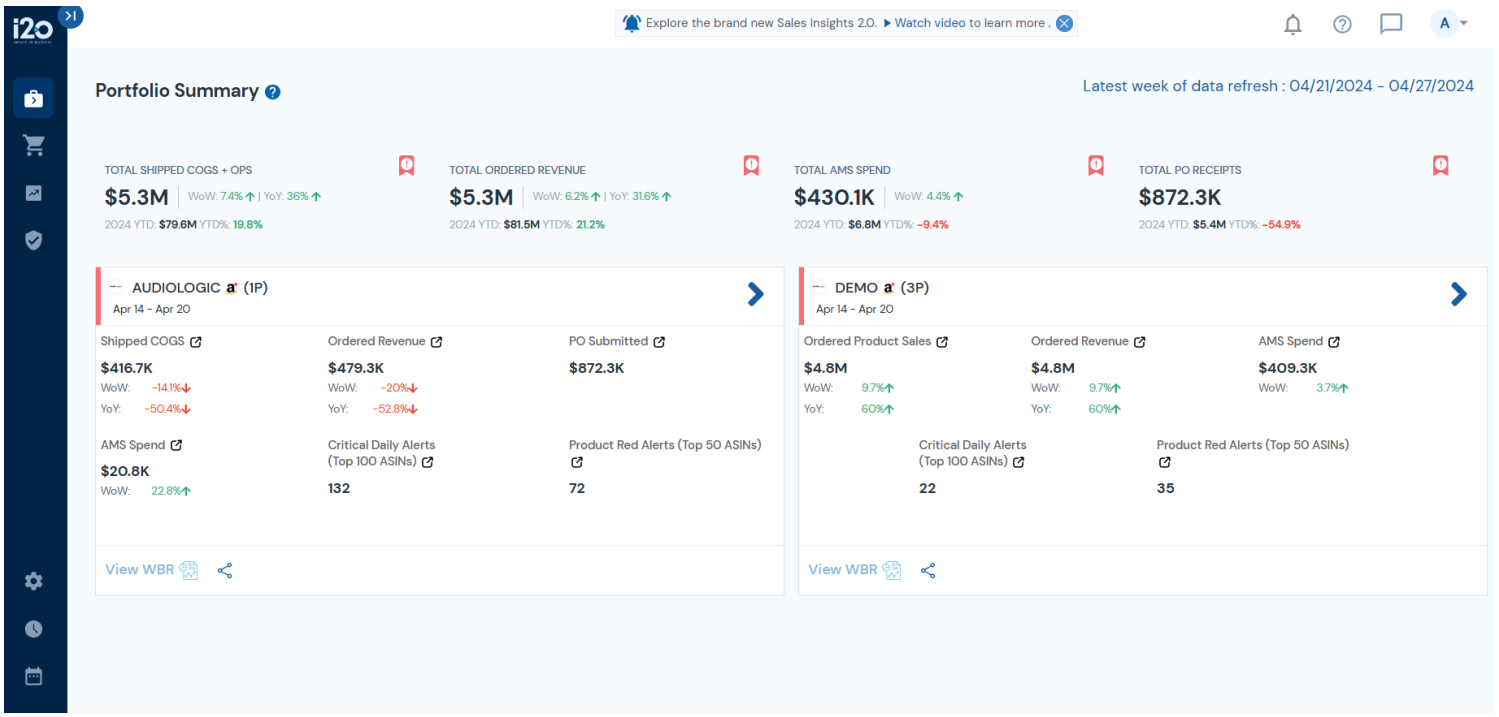
KEY METRICES FOR 1P	KEY METRICES FOR 3P
Shipped COGS	Ordered Product Sales
Ordered Revenue	Ordered Revenue
AMS Spend	AMS Spend
Critical daily alerts (Top 100 ASINs)	Critical Daily Alerts (Top 100 ASINs)
Product red alerts (Top 50 ASINs)	LW Alerts & Exceptions (Top 50 ASINs)
PO Submitted	

How to View Portfolio Summary

1. Open your web browser.
2. Navigate to the official i2o website.
3. Enter your credentials i.e. user ID and password.



4. Click on **Log in**.
5. The Portfolio Summary is prominently displayed as the initial screen upon accessing your account.



Total Card

- The total card on the top of the display is a simple sum total of the metrics from each individual brand cards, this card is available at organizational level on Account Portfolio page as well as on the Account Portfolio Detail page.
- The view shows the latest week's data, identified by a tick mark within a green flag. If there are delays in data refresh, the prior week is indicated by an exclamation mark in a red box.
- The total card displays four comparative metrics: YoY, WoW, YTD, and YTD%, making it easy to track performance.

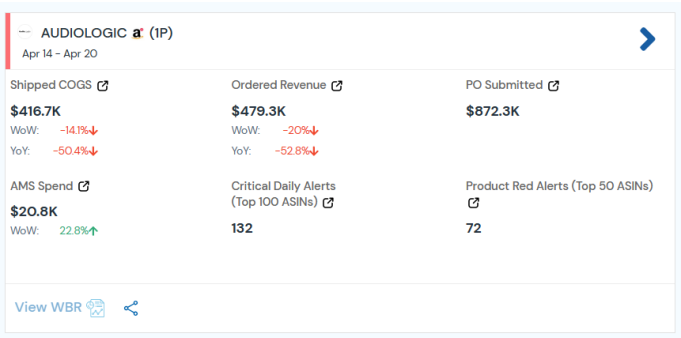
KPI Card at organizational level

The performance summary is presented through KPI Cards, with their display tailored to the user's access level in the i2o application. Users can rearrange brand cards by **swapping** or **dragging** them to the preferred positions. The 1P and 3P brand cards are displayed separately. If you have a brand for both 1P and 3P, the KPI card will appear twice on the portfolio summary: once with 1P details and once with 3P details.

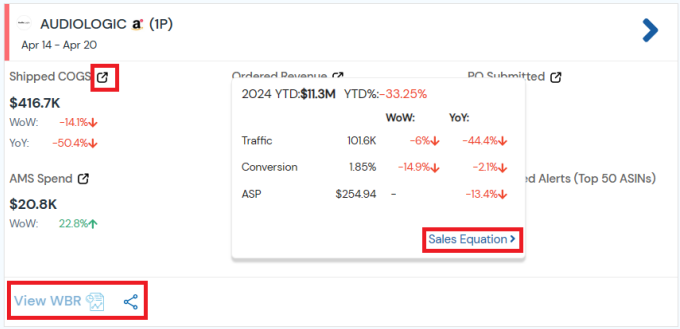
> Note: If you are unable to see brands of interest, kindly reach out to support for assistance. support@i2oretail.com

KPI Card Features at organizational level

1. **Performance Changes**: Positive or negative changes, whether week-over-week (WoW) or year-over-year (YoY), are represented by up or down arrows, respectively.



2. **Performance Details**: Click on the detail icon next to each metric, this shows further performance details. The details pop-up also takes you to the appropriate section of the concerned module, providing a more detailed drill-down summary.

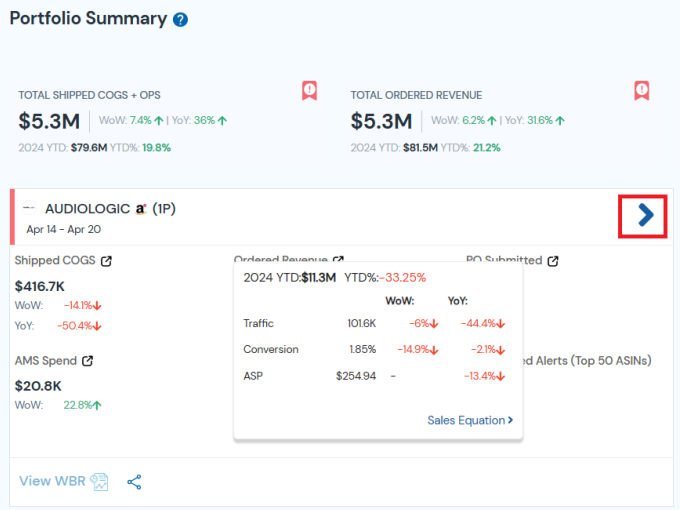


3. **View WBR**: This feature allows the user to navigate/download the latest week WBR (Weekly Business Report).

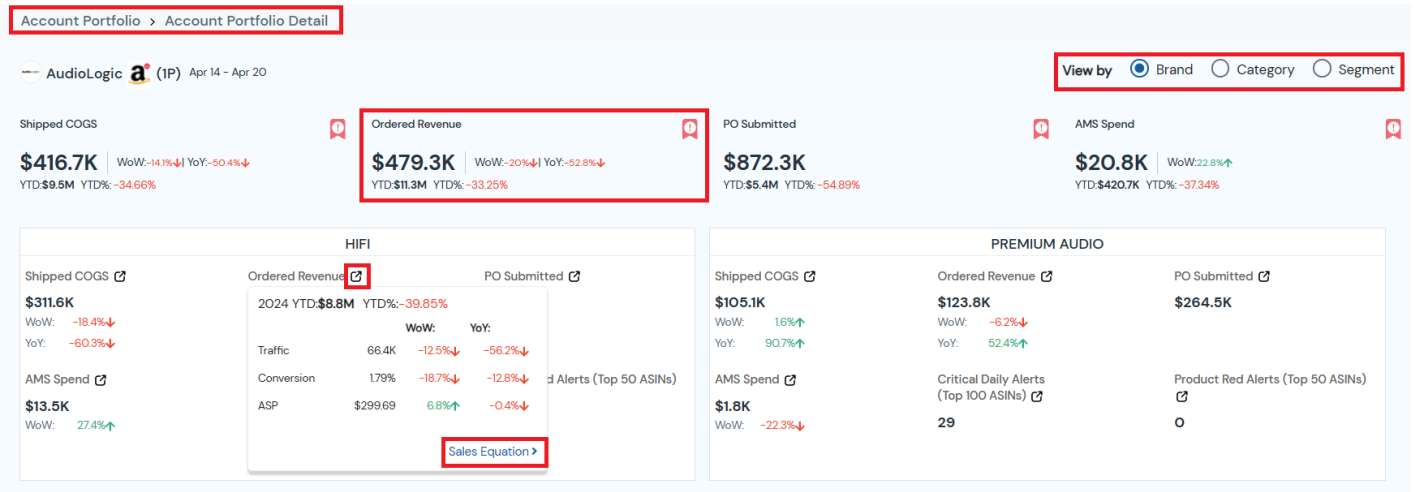
Extended Brand Drilldown

KPI cards are that are available at the **brand level**, provides all the features that available at the organizational level. To view extended brand drill-down, follow the steps below:

1. Click on the chevron-right button on the KPI card of required organization visible on the home screen of Portfolio Summary.



2. This opens the Account Portfolio detail page. Here, the total cards visible, now provide details for all the brands of that organization. The key metrics shown on the total cards represent the sum total of parameters for individual brands.
3. The KPI cards on the Account Portfolio detail page can be referred to as brand cards. They also display performance changes with metrics such as Shipped COGS, Ordered Revenue, PO Submitted, AMS Spend, Critical Daily Alerts and Product Red Alerts.



4. Click on the detail icon next to each metric. This shows a drill-down of performance details. The details pop-up also directs you to the appropriate section of the concerned module, this time with the pre-applied filters, as the navigation is from the specific brand/category.
5. The KPI cards default to the brand level. You can change the views between brand, category, and segment by clicking on the radio buttons.

Key Metrices
