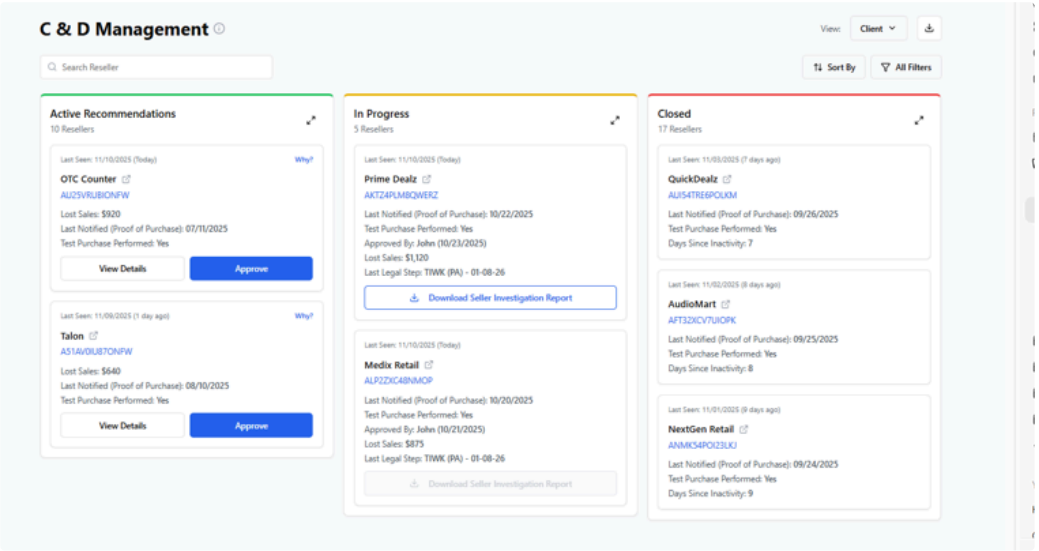
Cease & Desist - Seller Investigation + HOT Fix

The C&D Management feature enables clients and internal users to review recommended sellers, approve Cease & Desist actions, track legal progress, download investigation evidence, and monitor compliance outcomes across marketplaces



Active Recommendations

STORY: CND-AR-01 – View Active C&D Recommendations

As a Client user
I want to view sellers recommended for C&D in a dedicated swimlane
So that I can review and decide which sellers should be escalated for legal action

STORY: CND-AR-02 – View Seller Details from Active Recommendation

As a Client user
I want to view the detailed seller context before approving C&D
So that I can make an informed approval decision

STORY: CND-AR-03 – Approve Seller for C&D

As a Client user
I want to approve a seller for C&D
So that legal enforcement can begin

In Progress – Legal Tracking

STORY: CND-IP-01 – View In-Progress C&D Cases

As a Client user
I want to view sellers currently under C&D enforcement
So that I can track legal progress

STORY: CND-IP-02 – Display Current Legal Step

As a Client user
I want to see the current legal step for each seller
So that I understand enforcement status

Seller Investigation Report (PDF)

STORY: CND-PDF-01 – Download Seller Investigation Report

As a Client user
I want to download a seller investigation report
So that I can review or share legal evidence

STORY: CND-PDF-SEC-01 – Include Report Header & Metadata

As a client user
I want the report header and the generation date in the PDF
So that the context of the report is clear for legal or audit purposes

STORY: CND-PDF-PROFL-01 – Include Seller Details Section

As a user
I want contact, business, and location details of a seller in the report
So that I can confirm the legal entity behind the marketplace account

STORY: CND-PDF-MKTPL-01 – Include Cross-Marketplace Presence Breakdown

As a user
I want marketplace presence details for the seller
So that I know where violations took place

STORY: CND-PDF-HIST-01 – Include Enforcement History Section

As a user
I want to see previously sent notices and PoP history
So that enforcement correspondence is traceable

STORY: CND-PDF-INV-01 – Include Invoice Records Section

As a user
I want invoice receipts relevant to the case in the PDF
So that proof of purchase evidence is recorded

STORY: CND-PDF-TB-01 – Include Test Buy Orders Section

As a user
I want test buy order details included
So that enforcement evidence can be reviewed later

STORY: CND-PDF-BV-01 – Include Brand Violations Section

As a user
I want detected brand violations included in the report
So that violation types and statuses are documented

STORY: CND-PDF-ANL-01 – Include Analytics Summary

As a user
I want analytics like lost sales and inventory trends in the report
So that business impact is visible

STORY: CND-PDF-FOOT-01 – Append Branding & Footer

As a user
I want the PDF to include i2o branding and confidentiality footer
So that it is business-ready for legal sharing

Closed C&D Cases

STORY: CND-CL-01 – View Closed C&D Sellers

As a Client user
I want to view sellers who complied after C&D
So that I can assess enforcement effectiveness

Search, Sort, and Filter

STORY: CND-SSF-01 – Search Sellers

As a user
I want to search sellers by name or seller ID
So that I can quickly locate specific cases

STORY: CND-SSF-02 – Sort Sellers

As a user
I want to sort sellers
So that I can prioritize review

STORY: CND-SSF-03 – Filter Sellers

As a user
I want to filter sellers by attributes
So that I can focus on relevant enforcement cases

Role-Based Views (Client vs AM)

STORY: CND-RB-01 – Client View Permissions

As a Client user

I want to see only client-relevant actions

So that the interface remains simple and compliant

STORY: CND-RB-02 – AM (Internal User) View Permissions

As an AM user

I want to access internal enforcement controls

So that I can manage legal workflows

Download Button Behavior

STORY: CND-DL-01 – Define Download Button States

As a user

I want to clearly understand when downloads are available

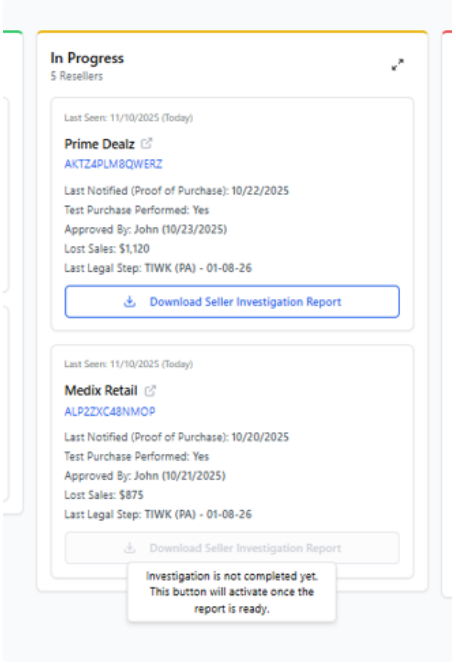
So that I don't click unavailable actions

Seller Investigation Report (PDF)

STORY: CND-PDF-01 – Download Seller Investigation Report

As a Client user **I want to** download a seller investigation report **So that** I can review or share legal evidence

Detailed Description



The Seller Investigation Report download is **gated** and becomes available **only after an internal Account Manager (AM)** has reviewed and confirmed that the report is complete.

- Until the report is marked ready:
  - The download button remains **disabled**
  - A contextual message explains why it is unavailable
- Once the AM confirms readiness from the internal interface:
  - The button becomes active on the **client-facing C&D screen**
  - The client can download the report in a single click
- Only AM users are allowed to preview and publish the report

---

Functional Scope

Client View

- Sees the **Download Seller Investigation Report** button in the *In Progress* swimlane
- Button state reflects backend readiness
- Client has **no control** over report readiness or publishing

AM (Internal) View

- AM can:
  - Preview the investigation report
  - Confirm and publish the report
- AM action directly controls client button activation

Button States & Behavior

1. Disabled State (Report Not Ready)

- Button is disabled
- Hovering shows tooltip/message:

  “Investigation is not completed yet.
  This button will activate once the report is ready.”
- Optional enhancement (if data available):
  - Show **estimated readiness time** (e.g., “Expected by 14 Oct, EOD”)

---

2. Enabled State (Report Ready)

- Button becomes active immediately after AM confirmation
- Clicking downloads the PDF in one click
- No confirmation modal required for the client

Acceptance Criteria

Readiness Gating

- Download button is **disabled by default**
- Button becomes enabled **only after AM marks report as ready**
- State syncs in real time or on refresh

Role-Based Control

- Client users:
  - ❌ Cannot preview or publish report
  - ✅ Can download only after readiness
- AM users:
  - ✅ Can preview report
  - ✅ Can mark report as ready
  - ❌ Cannot publish without preview (if enforced)

Messaging

- Disabled button shows clear tooltip/message
- Message text matches UX copy approved by Product
- No ambiguous “error” states shown to client

Download Behavior

- File downloads successfully on click
- File format: PDF
- File name format: <YYYYMMDD> represents date of download

```
<Account_Name>_<SellerName>_<YYYYMMDD>_Seller_Investigation_Report.pdf

```

Edge Cases & Rules

- If report is unpublished or revoked:
  - Button returns to disabled state
- If report generation fails:
  - Button remains disabled
  - Client does not see technical error details but a message download failed should show up and client should be asked to retry

- If AM updates report after publishing:
  - Latest version is downloaded automatically

Dependencies

Backend

- Report readiness flag (`report_status = READY`)
- AM publish action endpoint
- Optional ETA field (`estimated_ready_at`)

Frontend

- Button state handling (enabled / disabled)
- Tooltip or inline helper text
- Role-based access control (Client vs AM)

Internal Tooling

- AM preview screen
- “Mark as Ready / Publish Report” action

Out of Scope (Explicit)

- Client-side report editing
- Auto-publishing without AM confirmation
- Emailing report to client
- Partial or section-wise downloads

QA Scenarios (High-Level)

1. Client sees disabled button before AM confirmation
2. AM publishes report → client sees enabled button
3. Client downloads report successfully
4. Tooltip appears correctly when disabled
5. Non-AM internal user cannot publish report

STORY: CND-PDF-SEC-01 – Include Report Header & Metadata

As a client user **I want** the report header and the generation date in the PDF **So that** the context of the report is clear for legal or audit purposes

Detailed Description

Header Composition

The PDF header must contain **exactly three elements**:

1. **i2o Logo**
   - Use the **latest approved i2o logo**
   - Position: **Top-left** of the report
   - Logo should appear consistently on all pages (header repeat behavior as per PDF standard)
2. **Date Generated**
   - Display the **date of download**, not report creation
   - Format: `MMM DD, YYYY` (e.g., Sep 8, 2025)
   - Positioned in the header (right-aligned or as per existing layout)
3. **Confidentiality Text**
   - Text:
     "CONFIDENTIAL – FOR AUTHORIZED USE ONLY"
   - **No copy or styling changes**
   - Must be clearly visible in the header area

Acceptance Criteria

- Header appears on the PDF with all three elements present
- i2o logo matches latest brand asset
- Generation date reflects the actual download date
- Confidential text remains unchanged and readable
- Header renders consistently across pages

Out of Scope

- Custom branding per client
- Editable header content
- Time (only date is required)

STORY: CND-PDF-PROFL-01 – Include Seller Details Section
